

The Cost of Data Loss!

“Most companies value 100 megabytes of data at more than \$1 million”

“It is estimated that 1 out of 500 data centers will have a severe disaster each year” (McGladrey and Pullen)

43 percent of companies experiencing disasters never reopen, and 29 percent close within two years. (McGladrey and Pullen)

Causes of Data Loss

Human Error- is the single largest contributor to incidents of data loss. Common human errors include accidental deletion, Drive format, administrator errors, mishandling.

Software Corruption- Incidents when popular applications Like word-processor, spreadsheet, database, email have Caused corruptions resulting in data loss are widespread

Computer Viruses- have wrecked an estimated \$10.7 Billion in clean-up costs and lost productivity world wide.

Sabotage Cases of sabotage are being reported regularly and are increasing at alarming rate.

Costs associated with Data Loss:

Three main quantifiable costs associated with each incident of data loss:

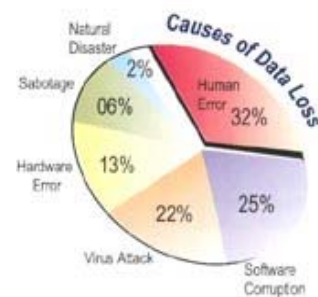

- The cost of technical support in the recovery effort
- Lost productivity due to user downtime
- Possible cost associated with data that is permanently lost.

Implications to an organization after DATA LOSS

- Lost Contracts
- Project Delays
- Financial Loses
- Manpower Losses
- Direct Immediate Losses

Estimated costs and amount of data loss are likely to increase as businesses increasingly rely on a distributed computing environment.

Mobile laptops users face unique data protection challenges. Unlike PC's, laptops are more likely to have data loss or corruption instances. Further, mobile employees are constantly on the move and therefore less able to manage a regular backup protocol.

Popular Data Safety Measures and the Risk Involved

Threats Vs. Protection Options	Human Error	Virus Attack	Software Corruption	Sabotage	Hardware Error	Natural Disaster
RAID Systems	✗	✗	✗	✗	✓	✗
Mirrored Systems	✗	✗	✗	✗	✓	✗
Backup	✗	✓	✓	✗	✓	✓
Anti Virus	✗	✓	✗	✗	✗	✗

✗ = Risk

*Even with all above data protection mechanisms in place your data is at a **Major Risk***

Finding an optimum solution

When time is crucial and data is mission-critical, **Data recovery may** be the most practical option available for any organization or individual that has experienced DATA LOSS!!!

Data Recovery is necessary when:

Your backup and restore system fails

Your mirrored system fails

Re-creation is impractical or impossible

Your anti-virus is not updated or not able to act in case of a new virus attack.

Computer Viruses have wreaked an estimated \$10.7 Billion in clean up costs and lost productivity world-wide. (Computer economics)

Beware of Backups

Recently dept. of trade and industry Research has shown that even when companies think that they have backed up their systems adequately, 60% of these do not work.

WHY Data Recovery Software are better than Data Recovery Services

Data Recovery Software	Data Recovery Services
Software products tested and approved by various magazines and test centers.	Doubtful technique/lack of confidence in recovery service provider
More cost effective solution to retrieve your lost data. The product can be repeatedly used.	High recovery costs. (An average successful Data Recovery by a service provider costs around US\$ 700.)
Provides a fast turn around time and quick restoration of data.	High turnaround time due to delay in shipping, diagnosis, order & recovery.
No data drain	High possibility of data drain
Fully automatic software, requiring less technical knowledge on part of the user. User-friendly interface.	Inconvenience to service system
Trial demo versions are available, which a person can use to determine if Data Recovery is possible, prior to purchasing	Wastage to time if after analysis data recovery is not possible.

Stellar Information Systems Ltd. offers a complete solution to your Data Loss problems, with Stellar Phoenix Data Recovery Software.

Stellar Information Systems Ltd

The Company

Stellar is a trusted name in data recovery and data safety. Through its advanced Research and development; Stellar has been providing data recovery services and solution for all media types and operating systems. Equipped with necessary infrastructure and trained manpower Stellar provides accurate, confidential & cost effective data safety & integrity solutions to its customers.

Our Quality Policy

"Achieving total customer satisfaction by delivering data security & safety through quality products, services, solutions and training. Aiming for continuous improvement in our services and products through structured employee training programs and involvement of our business partners."

Key Facts

- **Pioneer and market leader in Data Safety and Data Recovery Software & Solutions.**
- **Over 10 Years of rich experience.**
- **An ISO 9001-2000 recommended company**
- **Offer express Data Recovery Services from all major storage devices & operating systems.**
- **Over 10,000 satisfied users spread across 47 countries.**
- **Extensive partner network worldwide.**

Stellar products provide immunity against data loss caused by numerous threats like accidental format, virus problems, software malfunction, file/directory deletion or sabotage through its elaborate product range.

- Stellar Phoenix: Data Recovery Software helps in recovering the all-important data after the system has suffered data loss.
- Stellar Shield: Data Safety Software is pre-crash utility to safeguard the data against all threats.
- Stellar Wipe: Safe Data Eraser is designed to destroy confidential and classified files beyond recovery.

We provide expert [Data Recovery Services](#) from hard disk drives, tapes, zip disks, CD-Rom, flash cards and other storage media. Hard Drive Data Recovery services from all operating systems including Windows NT, Windows 2000, Windows XP, Windows'95, Windows'98, Windows ME, MS-DOS, UNIX, LINUX, AIX, HP-UX, Sun Solaris, Novell NetWare and Mac.

Stellar has received various certificates and awards from **Computers Today, PC World, PCQ Labs** etc for its initiatives in the area of Data Safety and Data Recovery. Popular IT Magazines like **CHIP Italy, Computer Shopper UK, PC magazine Middle east**, have reviewed our software products.

The superior **R&D and the highly trained professionals** are the driving factors for the huge success of the company. The impressive clientele database bears testimony to this fact.

STELLAR PHOENIX – DATA RECOVERY SOFTWARE “A COMPLETE ANSWER TO DATA LOSS”

Stellar Phoenix -Data Recovery Software helps you in recovering lost data after

- An accidental format
- Virus attack
- Human Error
- Partition loss
- Software malfunction
- File / Directory deletion or even sabotage.

Stellar Phoenix examines your inaccessible hard disk drive for damages & corruption's and recovers the data back in minutes.

Phoenix is particularly helpful in following cases of data loss:

- Formatted Drive
- Inaccessible Drive
- Drive Not Booting
- Missing File/Directory
- Deleted File/Directory
- Corrupt or damaged Partition Table.

Stellar offers a complete solution for Data Recovery with software products for all major operating system and file systems.

Product	Recovers Data from	File system supported
Stellar Phoenix FAT	Windows 95/98/ME/NT/2000/2003/XP	FAT16, FAT32 and VFAT file system
Stellar Phoenix NTFS	Windows NT (Workstation & Server Edition), Windows 2000 (Professional, Server & Advanced Server), Windows XP (Home Edition & Professional) and Windows 2003 Server	NTFS and NTFS5 file system
Stellar Phoenix FAT & NTFS	Windows 95/98/ME, Windows NT (Workstation & Server edition), Windows 2000 (Professional, Server & Advanced Server), Windows XP (Home Edition & Professional) and Windows 2003 Server	FAT16, FAT32, VFAT, NTFS and NTFS5 file system
Stellar Phoenix Linux	Ext2 and Ext3 file system based drives on all flavours of Linux including Red Hat, Suse, Caldera, SCO, Debian, Mandrake, Sorcerer, Turbo-Linux, Slack ware and others	Ext2 and Ext3 file system
Stellar Phoenix CD-Rom	CD's with ISO9660 and Joliet file system created on all major operating systems including Windows, Linux & Unix distributions	ISO9660 and Joliet file system
Stellar Phoenix Novell	Novell Netware 3.1 and above	Netware file system (NWFS)
Stellar Phoenix Macintosh	Apple Macintosh 3.0 and above	HFS and HFS+ file system
Stellar Phoenix Recovery Suite	Win 95/98/ME, Windows NT (Workstation & Server Edition), Windows 2000 (Professional, Server & Advanced Server), Windows XP (Home Edition & Professional), Windows 2003 Server, Linux (all distributions) and CD Rom (all distributions)	FAT16, FAT32, VFAT, NTFS, NTFS5, Ext2, Ext3, ISO9660 and Joliet file system

Stellar Phoenix FAT - Data Recovery Software

Key Features

- Provides file recovery from deleted and damaged partitions.
- Provides recovery from missing files(s) and folder(s).
- Data recovery after the loss of MBR, Boot sector or total loss of allocation information (FAT).
- Provides recovery of data lost due to accidental formatting of your hard disk.
- Recovery of file that becomes inaccessible due to a virus attack.
- Provides file recovery from fragmented/broken directories through its advanced search features.
- Recognizes and preserves localized names.
- Advanced file search and file filtering options for refined data recovery results

User-friendly Interface

- It creates a directory and file tree of the file(s) and folder(s) found on the logically damaged hard disk and allows user to select the data and transfer it to destination path.
- Standard “Windows Explorer” - style interface

File System Supported

- FAT16
- FAT32
- VFAT

Systems Requirement

- Pentium-class processor
- Windows 9X/ME/NT/2000/XP/2003
- 64 MB RAM (128 MB recommended)
- 10 MB free space

Interface Languages Available

- English, French German, Spanish, Italian.

Delivery Options

- Physical Box Distribution
- ESD (Electronic Software Distribution)

Software License Options Available

- Single User License

Stellar Phoenix NTFS - Data Recovery Software

Key Features

- Provides recovery of deleted files and folders even after recycle bin has been emptied or use of 'Shift+Del' key.
- Provides partition recovery from deleted partition or formatted logical drives.
- Provides data recovery from Missing or Lost folders.
- Performs recovery after corruption of critical system data area structures like MFT record.
- Recognizes and preserves long file names when restoring files & folders.
- Multi-Disk Drive Support - Performs NTFS partition recovery on all IDE, EIDE and SCSI disk devices.
- Advanced search options for file search and file filter for selected recovery of files and folders.

User-friendly Interface

- It has an interactive tree structure to view, select (tag) and recover files and directories to a safe location.
- Standard "Windows Explorer" - style interface.

File System Supported

- NTFS
- NTFS5

Systems Requirement

- Pentium-class processor
- Windows 9X/ME/NT/2000/XP/2003
- 64 MB RAM (128 MB recommended)
- 10 MB free space

Interface Languages Available

- English, French German, Spanish, Italian.

Delivery Options

- ESD (Electronic Software Distribution)
- Physical Box Distribution

Software License Options Available

- Single User License

Stellar Phoenix FAT & NTFS - Data Recovery Software

Key Features

- Provides recovery from FAT16, FAT32, VFAT, NTFS, and NTFS5 file systems.
- Recovers deleted files/folders even after recycle bin has been emptied or use of Shift+Del key.
- File recovery from deleted partition or formatted logical drives.
- File recovery from Missing or Lost folders.
- Recognizes and preserves long file names when restoring files & folders.
- Multi-Disk Drive Support - Performs NTFS recovery on all IDE, EIDE and SCSI disk devices.

User-friendly Interface

- Interactive tree structure to view and select (tag) and recover files and directories to a safe location.
- Advanced search options for file search and file filter for Selected recovery of files and folders.
- Standard “Windows Explorer” - style interface.

File System Supported

- FAT16, FAT32 and VFAT
- NTFS and NTFS5

Systems Requirement

- Pentium-class processor
- Windows 9X/ME/NT/2000/XP/2003
- 64 MB RAM (128 MB recommended)
- 10 MB free space

Interface Languages Available

- English, French German, Spanish, Italian.

Delivery Options

- ESD (Electronic Software Distribution)
- Physical Box Distribution

Software License Options Available

- Single User License
- Commercial License

Stellar Phoenix Novell - Data Recovery Software

Key Features

- Provides Data Recovery from corrupt volumes after damage in file data structures.
- Novell Netware Partition Recovery from sub allocated data volumes.
- Provides Netware Volume recovery from compressed files and directories.
- Data recovery from segmented volumes.
- Data Recovery from volumes in case of failure of 'Vrepair' to repair corrupt volume.
- Provides Novell partition recovery through structured Phase wise analysis requiring no technical skill.
- This Software need not be installed prior to data loss.
- Multi-Disk Drive Support - Perform Novell recovery on IDE, EIDE and SCSI disks.

User-friendly Interface

- Interactive tree structure to view and select (tag) and recover files and directories to a safe location.
- Advanced search options for file search and file filter for Selected recovery of files and folders.
- Standard "Windows Explorer" – style interface.

File System Supported

- NWFS (Netware File System)

Systems Requirements

- Pentium-class processor
- Windows 9X/ME/NT/2000/XP/2003
- Minimum 64MB (Recommended 128 MB)
- Novell Netware 4.X and above (for compressed file recovery only).

Interface Languages Available

- English, French German, Spanish, Italian.

Delivery Options

- ESD (Electronic Software Distribution)
- Physical Box Distribution

Software License Options Available

- Single User License
- Commercial License
- Corporate Site License
- Academic License

Stellar Phoenix Linux - Data Recovery Software

Key Features

- Provides Linux partition recovery from a deleted logical partition.
- Allows data recovery from missing files and folders.
- Provides recovery of deleted file(s) [ext2fs only].
- Data recovery on Linux systems with damaged Super Block or I-node List.
- The software scans the disk trying to find previously existing partitions and restore the file(s), allowing Linux Partition Data Recovery.
- Recovers file(s) from IDE/EIDE/ATA & SCSI hard drive media.
- Recovers file(s) and folder(s) under sub-directories after the parent directory are deleted or missing

User-friendly Interface

- Advanced File Mask option in accordance to file name, size and date.
- You can save the scan information and later you can use this information to load the tree.
- Any process can be halted any moment to view the results and the log generated can be saved as file.
- You can view the properties of the file(s) & folder(s).

File System Supported

- Ext2
- Ext3

Systems Requirement

- Pentium-class processor
- Windows 9X/ME/NT/2000/XP/2003
- 64 MB RAM (128 MB recommended)
- 10 MB free space

Interface Languages Available

- English, French German, Spanish, Italian.

Delivery Options

- ESD (Electronic Software Distribution)
- Physical Box Distribution

Software License Options Available

- Single User License
- Commercial License
- Corporate License
- Academic License

Stellar Phoenix CD-Rom - Data Recovery software

Key Features

- File recovery from damaged CDROM, CD-R and CD-RW.
- Data recovery when TOC (Table of Contents) is bad or damaged.
- Fully automatic CD Data Recovery software provides data recovery even after primary volume descriptor and secondary volume descriptor are corrupt or physically damaged.
- Data recovery when data cannot be accessed and disk indicates that it is full.
- Provides file recovery when disk has physical damages: scratch, bubbles, cracks and warping.
- Provides CD data recovery when computer freezes when trying to read the disk.
- Provides CD file recovery when disk has data but appears blank or displays as audio disk.

File System Supported

- ISO9660
- Joliet file system

Systems Requirement

- Pentium-class processor
- Windows NT/2000/XP/2003
- 64 MB RAM (128 MB recommended)
- 10 MB free space

Interface Languages Available

- English, French German, Spanish, Italian.

Delivery Options

- ESD (Electronic Software Distribution)
- Physical Box Distribution

Software License Options Available

- Single User License
- Commercial License
- Corporate Site License
- Academic License

Stellar Phoenix Macintosh - Data Recovery Software

Key Features

- Provides partition recovery from deleted partition or formatted logical volumes.
- Provides Macintosh Data Recovery from Missing or Lost folders.
- Recognizes and preserves long file names when restoring files & folders.
- Multi-Disk Drive Support - Performs recovery on all IDE, EIDE and SCSI disk devices.

User-friendly Interface

- Has an interactive tree structure to view, select (tag) and recover files and directories to a safe location.
- Standard “Windows Explorer” - style interface.
- It has an advanced search option for file search and file filter for selected recovery of files and folders.

File System Supported

- HFS
- HFS+

Systems Requirement

- Pentium-class processor
- Windows 9X/ME/NT/2000/XP/2003
- 64 MB RAM (128 MB recommended)
- 10 MB free space

Interface Languages Available

- English, French German, Spanish, Italian.

Delivery Options

- ESD (Electronic Software Distribution)
- Physical Box Distribution

Software License Options Available

- Single User License
- Commercial License
- Corporate License

Stellar Phoenix Recovery Suite

Stellar Phoenix Recovery Suite - is a **NON-DESTRUCTIVE** and **READ ONLY** file & partition recovery utility that helps you in recovering your all important data lost after accidental format, virus problems, software malfunction, file/directory deletion, or even a sabotage! Stellar Phoenix examines your inaccessible hard drives for damages and corruptions and recovers the data back.

Why choose Stellar Phoenix Recovery Suite?

Most cost effective solution supporting the widest range of operating system and file system Recovery in a **single product**

Recover data from hard drives working on all major Windows and Linux Platform.
Windows 95/98/ME/NT/2000/2003/XP, Linux (all distributions) and CD Rom (ISO 9660 and Joliet all distributions)

Recover data from Windows'95/98/ME/NT/2000/2003/XP

- Provides recovery from FAT16, FAT32, NTFS and NTFS5 file systems.
- Recovers deleted files/folders even after recycle bin has been emptied or use of Shift+Del key.
- File recovery from deleted partition or formatted logical drives.
- File recovery from Missing or Lost folders.

Recover data from Linux (Ext2 and Ext3 file system) on all distributions

- Provides Linux partition recovery from a deleted logical partition.
- Allows data recovery from missing files and folders
- Data recovery on Linux systems with damaged Super Block or I-node List.
- The software scans the disk trying to find previously existing partitions and restore the file(s)

Recover data from CD Rom (ISO9660 and Joliet) on all distributions

- File recovery from damaged CDROM, CD-R and CD-RW.
- Provides data recovery when TOC (Table of Contents) is bad or damaged.
- Fully automatic software provides data recovery even after primary volume descriptor and secondary volume descriptor are corrupt or physically damaged.
- Provides file recovery when disk has physical damages: scratch, bubbles, cracks and warping.

User-friendly interface

- Interactive tree structure to view and select (tag) and recover files and directories to a safe location.
- Advanced search options for file search and file filter for Selected recovery of files and folders.
- Standard "Windows Explorer" – style interface

Stellar Phoenix Recovery Suite (continued)

File System supported

- FAT16, FAT32 and VFAT
- NTFS and NTFS5
- Ext2 and Ext3FS
- ISO9660 and Joliet file system

Systems Requirement

- Pentium-class processor
- Windows 9X/ME/NT/2000/XP/2003
- 64 MB RAM (128 MB recommended)
- 10 MB free space

Interface Languages Available

- English, French German, Spanish, Italian.

Stellar Phoenix Recovery Suite						
User Segment	Universities, Colleges, Schools and Training organisations					
License Duration	One year					
License Description	Provides unlimited data recovery from the number of PC's for which the coverage license is provided					

Customer Testimonials

“Last night, my 250GB external drive disappeared from Windows' view.

That disk is full of useful stuff; the critical files are backed up, of course, but there's probably 200GB of accumulated data and programs on there that's not backed up and that I'd really prefer not to lose.

I tried three different downloads - GetDataBack, R-Studio, and Stellar Phoenix. Stellar Phoenix seemed to be the smartest and cleanest of the three, bringing up a complete directory tree without trouble. R-Studio allowed me to recover some small files - but they were corrupt!

Full of trepidation, I bought Stellar Phoenix FAT version this morning. I re-ran the scan. When it finished, I recovered a small JPG file. And it was good. I recovered another file, then an entire directory tree - all good!

Thanks to Stellar Phoenix my files are saved! Hooray for Stellar Phoenix

Andrew Maizels

Just wanted to thank you for having such an excellent product. We had the recent misfortune of a power failure that damaged a very important hard drive. Even though the operating system ignored the drive and it overheated terribly and crashed the computer after 20 minutes or so of running I was able to retrieve almost all of the data from the drive before it totally died. The diagnostics had shown 6 unrecoverable blocks on the NTFS formatted drive and your software found all 6 blocks and let me see the contents and pull out what was critical. I was able to extract the data from the damaged drive within 48 hours.

Couldn't have done it without your software."

Mike Rusk

Great product. I had a mirror pair of 60GB IDE drives on a Promise TX2 controller when there was a drive failure. According to Promise documentation, I should have been able to plug the good drive into my onboard IDE controller and access it like a new drive but such was not the case. It showed as a Foreign Drive and would not import into Windows 2000 Server. I even tried putting it in other machines with Windows 2000 Professional and Windows XP since it was NTFS. I thought I had lost the last 10 years of my life.

I found your product on the Internet, downloaded the demo and viola!, it read the drive. After purchasing Stellar Phoenix NTFS, I was able to recover the entire drive.

Thank you. Your product is well worth the money.

Todd Vohs Holstein, IA

You succeed in customer service, something that turns a company into a profitable business (if you are not one already). You can include my words in your web site "I recovered 240 important Gigs, don't hesitate...buy it".

There are a lot of similar products out there, which charge the customer according to the Gigs. They are seriously playing with victims, not customers. Their products also do less than yours (in simple words).

Many thanks for the best software I have tried over the past 12 years. Keep it up.

[George Fountoulakis.](#)

I think you're product is great... easy to use, does the job. I tried many other demos, and only one worked as well as yours, but your did look more professional.

All in all, I am truly thankful for your product. It saved me about 2 weeks of documentation that would have been otherwise lost.

[Michael Quimby](#)

This software is great; I have been able to add a whole new branch to my services. This software has already paid for it's self."

[Kelly Bush](#)

"I am a biomedical researcher, and when the hard-drive on my laptop recently failed due to a mechanical malfunction, I lost almost one-year worth of valuable data. Estimates for recovery were in the range of US \$800-2500. I downloaded multiple do-it-yourself data recovery program without luck, most did not even recognize my hard drive, much less see the file structure. However, Stellar Phoenix recognized my entire file structure, and was able to fully recover the vast majority of my data. All for US \$200! Thank you very much!"

[Aamer Jamali, MD](#)
[USA.](#)

Thank you so much!!! I've recovered really important files that I've lost a month ago... THANK YOU SO MUCH, thanks to people like you that the IT world is becoming amazing..."

[Pasquale](#)

"Thanks a lot, your software saved my life .
I've been able to get back a hundred gig of lost data"

[Eric Pare](#)
[Canada](#)

Thank-you for your prompt response & your interest & concern to help me. I really appreciate it. I tried your instructions and your program works very well. The first time I tried to move selected files, a lot of what was transferred was 8kb sized files, many may have been past deleted files, and I'm not sure.

Stellar Phoenix FAT was a great success for me and I'm sure it will be for many other people! Again, Thank-you for you prompt interest in helping me & for a great & much needed product!"

Reviews

<p>Review of Stellar Phoenix FAT 9.0 in “PC Magazine Middle East” (Jan, 2003 issue) Given below is an extract from the review “The software doesn’t require a valid partition table, boot sector or allocation information to recover data. It examines and analyses the media and creates a report of the File system in the memory logically for FAT16, FAT32 File system. It creates a directory and file tree of the files and the folder found on the logically damaged hard disk and allows the user to select the destination path.</p>	
<p>Review of Stellar Phoenix FAT 9.1 in Digit (October, 2003 Edition) Given below is an extract from the review Stellar Phoenix is a data recovery tool that allows a user to recover vital data from a logically damaged hard disk drive. This software is surprisingly easy to use. In case of a hard disk crash, all you need to do is attach your crashed hard drive to another system, configure it as a secondary drive and install the program on a healthy hard disk. The Phoenix software will then try and recover the data from your crashed drive.</p>	
<p>Review of Stellar Phoenix Linux 2.1 in “Linux for You” Magazine (November, 2003) Given below is an extract from the review “Stellar Phoenix Linux is very handy for the Linux network administrators as well as home users who keep important data on their hard disks. The tool provides Linux data recovery from a deleted logical partition and can also recover data from the missing file(s)/folder(s). It also recovers deleted files.</p>	
<p>Review of Stellar Phoenix FAT 9.1 in “PC Quest” Magazine (September, 2003) Given below is an extract from the review Stellar Phoenix 9.1 works on all Windows versions up to XP Professional. The software is entirely Windows-based and has a nice GUI with context-sensitive user guide and other features like file filter and file mask. It costs about as much as a 40GB hard-disk itself, but it’s worth it if you’ve lost data and are all harried to get it back, because it works.</p>	
<p>Product: Stellar Phoenix FAT 9.1 Stellar Phoenix FAT 9.1 advanced data recovery software is built on a search engine that ensures faster and comprehensive scanning of your hard drive. It recovers data lost due to file deletion, accidental formatting, virus corruption, corrupt partitions, and sabotage from all FAT logical drives on the Windows platform.</p>
